## Fountain Pen

The innovative cap has unique "Slip & Seal" mechanism.  
It prevents ink from drying out with the inner cap that makes complete airtightness.  
It provides smooth writing with fresh ink even after 2 years.

Max diameter: 18mm  
Weight - 34.1g

## Izumo 'Kaga' Maki-e PIZ-300000

Nib - 18K (F, M, B)  
Base Material - Ebonite  
Surface Finish - Hira Maki-e  
Size - Length: 154mm  
Max diameter: 18mm  
Weight - 33.9g

## Izumo 'Kaga' Maki-e PIZ-300000

Nib - 18K (F, M, B)  
Base Material - Ebonite  
Surface Finish - Hira Maki-e, Raden  
Size - Length: 154mm  
Max diameter: 18mm  
Weight - 33.9g

## Izumo 'Aizu' Maki-e PIZ-300000A

Nib - 18K (F, M, B)  
Base Material - Ebonite  
Surface Finish - Togidashi Maki-e, Raden  
Size - Length: 154mm  
Max diameter: 18mm  
Weight - 33.6g

## Izumo Shikkoku Chikuringunkozu PIZ-150000C

Nib - 18K (F, M, B)  
Base Material - Ebonite  
Surface Finish - Sumiko Taka Maki-e  
Size - Length: 154mm  
Max diameter: 18mm  
Weight - 33.8g

## Izumo Shikkoku Chikuringunkozu

Gunkozu is a panel painting, believed to be the work of Tanyu Kano, in which tigers in a bamboo forest are drawn dynamically and with a unique style. On this fountain pen, a tiger with crossed front legs emerging from the bamboo forest is used as a motif.

The illustration is drawn over the jet-black matte body with sumikoage taka maki-e technique, using charcoal powder, called shoen, in several layers to provide a three dimensional look. The shadow produced by the height of the charcoal powder layers gives depth to the image, so as the barrel catches the light, the illustration is enhanced.

## Izumo Takeami

### PBA-120000G

Nib - 18K (F, M, B)  
Base Material - POM Resin  
Surface Finish - Bamboo Weaving  
Size - Length: 136.5mm  
Max diameter: 15mm  
Weight - 30g

Color#: 1 (Ankokushoku)

## Izumo Takeami

### PBA-120000G

Nib - 18K (F, M, B)  
Base Material - POM Resin  
Surface Finish - Bamboo Weaving  
Size - Length: 136.5mm  
Max diameter: 15mm  
Weight - 30g

Color#: 15 (Benikabairo)

## Izumo Takeami

### PBA-120000Y

Nib - 18K (F, M, B)  
Base Material - POM Resin  
Surface Finish - Bamboo Weaving  
Size - Length: 136.5mm  
Max diameter: 15mm  
Weight - 30g

Color#: 10 (Torafu)

## Izumo Takeami

The feature of this product is its elaborate main shaft which is woven by traditional craftsmen. Bamboo strips are finished by means of a process of "Oil Removal" (*Abura-nuki*) to enhance durability and add surface luster, "Rough Splitting" (*Arawari*) to cut each strip into an optimum size, followed by "Width Adjustment" (*Habatori*) to align the widths. Finally the strips are dyed using a unique formula.

## Izumo Yakumonuri

### PIZ-100000

Nib - 18K gold wide (F, M, B)  
Base Material - Ebonite  
Surface Finish - Yakumonuri  
Size - Length: 154mm  
Max diameter: 18mm  
Weight - 33.3g

Color#: 19 (Yakumo Byakudan)

## Hammered sterling silver

### PP-100000M

Nib - Platinum (M, B)  
Base Material - Sterling silver  
Surface Finish - Hammered  
Size - Length: 137mm

## Shunichi Nakata, Founder

“Success cannot be achieved without effort.”

With such belief in mind and committed to sale his own products of his own brand, nearly a century has passed since founder Shunichi Nakata came to Tokyo from Shimane Prefecture to embark on manufacturing of fountain pens. Following the establishment of the Nakaya Seisakusho in 1924 and launch of sales of fountain pens in Ueno in Tokyo, Shunichi began a mail order system pioneering the catalog ordering business in Japan, which led to the significant growth of the company that enabled sales of fountain pens throughout Japan. In 1928, the company's name was changed to “Platinum Fountain Pen,” along with the introduction of a company logo featuring a motif of the earth and Shunichi's initials “SN,” which represented his aspiration to become the master of metals and lead the world's number one fountain pen business. After the turmoil during the war and post-war period, Platinum Pen imported a plastic molding machine that was still rare in Japan from the U.K. in order to promote automation in 1952. At the time, Japan was in the midst of the tremendous export boom of fountain pens. Encouraged by such trend, Platinum Pen received a “Medal with a Green Ribbon,” the best award in the industry, for contributing to the acquisition of foreign currency. The award was presented by then Prime Minister, Shigeru Yoshida. However, the good

altitude. A massive promotional campaign centering on TV commercials was carried out under the advertising slogan “Good bye ink bottle,” which brought a huge impact to the industry while greatly appealing to the general market. Following such grand success, Platinum Pen achieved in creating a pen nib made of K18 gold after three years of trial and error with the aims to produce a luxury fountain pen.

Conventionally, K14 gold was believed to be the optimal material for a pen nib. Reversing such common knowledge in the industry, Platinum Pen created a pentagon nib in order to solve the problem of K18 gold being too soft and made use of the resiliency of the K18 that is easy to write with. The luster of the K18 gold enhanced the luxurious image of the pens compared with K14 gold and thereby gradually began to be well-received by the customers. In addition, “Platinum PLATINUM” that used high-grade metal platinum for the pen nib was launched. Platinum Pen continued to promote product development ahead of the times including “Platinum Sheep,” a sheep-leather rolling fountain pen. The founder's policy that “products should not be beyond customers' reach” has been handed down from generation to generation to the present day.

time did not last long and the Company was caught in the vortex of the worldwide price competition. To find a breakthrough, all technical experts combined their wisdoms to achieve, and came out with a “10-year pen campaign” that boldly provided a warranty of 10 years by employing iridium to a stainless steel pen point, which was considered to be technically difficult. In 1957, to further encourage domestic strategy by introducing a new epoch-making product, Platinum Pen realized the practical use of the cartridge style fountain pen “Honest 60,” which was equipped with a nib feeder that prevented ink from dripping. The following year, its performance was proven to the world by a climbing team that conducted an experiment in the Himalaya Mountains to demonstrate that the ink does not leak even in the high

## Toshihiro Nakata

Assumed presidency in 1968. In response to the diversification of consumption, Toshihiro actively implemented various product developments through cross-industrial cooperation that contributed to the cultural life, including the launch of “Harepane®,” a gluing foam panel in join hands with Asahi-Dow. In 1977, a sales company was established in N.Y. in the U.S.A in order to promote overseas strategy, followed by constructions of factories in Mexico and Taiwan to commence local production. A year later, the “#3776” fountain pen model was produced in collaboration with the late Mr. Haruo Umeda (novelist) in pursue of an “ideal fountain pen.” As being named after

Mount Fuji's altitude, we believe "#3776" model is literally one of the fountain pens that represents Japan, which is optimal for writing Japanese letters beautifully. The model is also a symbolic product of our company both in deed as well as in name. In 1989, the Company celebrated its 70th year in business. In commemoration of such milestone, a high-end handmade fountain pen (watermarked arabesque design;

made of letterwood, ebonite and celluloid) was launched by exploiting the traditional technique that the Company has nurtured over time, while also meticulously selecting the materials. This new fine pen has become one of the historic products.

Platinum Pen has continued to pioneer in delivering new products in the changing times where writing instruments became diversified, such as the "good design award" winning multi-function pen "Double Action R3," which came with a mechanical pencil and two colors of ballpoint pens that was sold at just 500 yen. Also, in 1993, "Pearl of Princes," a ballpoint pen with a real pearl was released in celebration of the marriage of Japan's Crown Prince Naruhito and Princess Masako that brought delight and joy to the entire nation.

Other various original products developed through Company's unique technology include "Yaku-Sugi" fountain pens that were carefully crafted from a precious Yaku-sugi (natural cedar wood) of over 3,000 years old as well as fountain pens that employed carbon that are extremely strong yet ultra light for the body of an innovative form, which was launched in commemoration of the Company's 90th years of business. In this way, Platinum Pen has been expressing its attitude of keeping the challenge alive, which has passed down since its foundation. In 2006, "PREPPY" series was launched, which was inspired by the fact that in some countries, children are taught to use

fountain pens when studying because it is believed to help fostering the ability to think by writing with fountain pens that cannot be erased once written. Striving to realize such a learning environment in Japan, too, PREPPY fountain pens are sold at a remarkably low price (200 yen) and are enjoying popularity around the world.

### Toshiya Nakata

Assumed presidency in 2009. Going back to the basics, company's principles "customers' pleasure is our delight" and "our mission is to bring the near future closer to the customers" are being thoroughly disseminated to all employees while also reflected in the product development. As the first step, "OLEeNU" mechanical pencils with a

function that protects the lead from breaking were launched in 2009, which was developed in response to the customers' requests to our repair department. Such idea on protecting the lead from the shock of falling or pressure of the writing was an innovative approach. In 2010, a new fountain pen series was released for the first time in 16 years. This unique and premium series "Izumo" that was

developed through an original point of view in terms of Japan's wonderful traditional crafts, distinctive materials and cultures worth protecting, has been designated as one of the "Izumo Brand-name products" recognized by Izumo City in Shimane Prefecture. Aspiring to further enhance popularity of the fountain pens, a superior model from the PREPPY fountain pen series was released that employed a thick aluminum body with a pearly finish, which offers a finer texture. Meanwhile, efforts also focused on enhancing the lineup of fountain pen related products. Examples include the

"fountain pen cleaning kit" that can be used for maintenance of the fountain pen so as to enable enjoying it for a long time as well as for changing the ink color. In addition, a fountain pen ink mixing kit was released to allow users to create their own favorite color for the fountain pen. Also, color variations of the pigment ink that are extremely functional have been enhanced. In this way, Platinum Pen has always been developing long-awaited products by fountain pen users as well as responding to the market needs. In 2011, our flagship model "#3776" fountain pen series had been completely renewed including the form and the writing feel over five-year period for the first time in 33 years. The new model was re-launched as "#3776 CENTURY." Among the many new features, the newly developed "Slip & Seal Mechanism" that prevents ink from drying, which is considered to be the weakest point of a fountain pen, to preserve a stress-free, smooth writing even after two years particularly provided a great impact to the market. Since then, a number of new original colors for the barrel are being added in response to the growing popularity. Our brush pen lineup was also renewed in 2012. The "Souhitsu" brush pen series was co-produced together with calligrapher Souun Takeda, which enabled users to enjoy writing with a brush pen, even beginners. Three types of brush pens with a newly-designed tip of the nib have been released so as to allow anyone writing *tome*, *hane* and *harai* stroke styles in calligraphy easily. As we approach our 100th anniversary of business, Platinum Pen is committed to continue creating one-and-only products that can satisfy our customers while keeping the spirit from the day of foundation at the core.
